SUMMARY

Dynamic full-stack developer with proven expertise in building scalable web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js) and Python Flask. Delivered production-ready projects, including a responsive Fitness Tracker with secure user authentication and goal tracking, and an interactive Climate Change dashboard featuring data analysis with Pandas, NumPy, and Matplotlib visualizations. Skilled in leveraging AI tools to generate, optimize, and debug high-quality code efficiently, while collaborating effectively in cross-functional teams. Passionate problem-solver with strong communication skills, eager to drive innovative solutions and accelerate development in a fast-paced professional environment.

SKILLS

- Frontend: HTML, CSS, JavaScript, React.js
- Backend: PHP, Python (Flask), SQL, MySQL, Node.js, Express.js
- Full Stack: MERN (MongoDB, Express.js, React.js, Node.js)
- Other: AI Integration (code optimization/debugging), Data Analysis (Pandas, NumPy, Matplotlib), Git, RESTful APIs, Agile Methodologies

SOFT SKILLS

- Strong problem-solving mindset with AI-driven efficiency.
- Effective communication and teamwork in cross-functional settings.
- Eagerness to learn new technologies and adapt quickly.

EDUCATION

BS in Software Engineering (Semesters 1-6)

Aug 2023 - Present

Ilma University , Karachi, Pakistan | GPA: >3.0

- Expected Graduation: 2027
- Relevant Coursework: Advanced Programming, Database Systems, Software Design Principles

ADSE 2.0 (Terms 1 – 6 Completed)

2020 – 2023

Aptech Learning Shahrah e Faisal , Karachi | Average 80%

Intermediate

2018 – 2020

Islamia Govt Sci College, Karachi, Pakistan | 72%

Matric

2016 – 2018

Iqra Huffaz Boys Secondary School , Karachi, Pakistan | 85%

Hifz e Quran

2010 – 2013

Iqra Huffaz Secondary School , Karachi, Pakistan | 98%

PROJECTS

Fitness Tracker - MERN Stack | June 2023 - August 2023

- Built a responsive full-stack web app using React, Node.js, Express, and MongoDB
- Implemented user authentication, workout logging, and goal tracking features
- Designed clean, mobile-friendly UI for seamless user experience

Climate Change Awareness App - Python Flask + Data Visualization 2024

- Developed backend with Flask and processed real climate datasets using Pandas & NumPy
- Created interactive charts and visualizations with Matplotlib
- Built responsive frontend with HTML, CSS, JavaScript for educational content delivery
